EXCHANGE HANDLED THIRD CITRUS CROP

CO-OPERATIVE ORGANIZATION EXPECTS TO CARE FOR LARGER PORTION OF THE CROP THIS YEAR.

The annual report for the fiscal year ending Aug. 31, as submitted by Business Manager C. E. Stewart, jr., to the board of directors of the Florida Citrus Exchange showed the year to have been the biggest in the history of the co-operative organization, in point of number of boxes of fruit handled, number of local associations affiliating, number of northern markets in which fruit was sold.

The exchange handled 32 1-4 per cent of the crop of the state; and figures showed the organization to be growing considerably faster than the increase of the state's citrus crop.

In its effort constantly to widen the distribution of its fruit, sixty-four new northern markets were opened and carload sales effected. Eleven new exchange packing houses are now under construction in various south Florida localities and the volume of fruit which the exchange will handle during the coming season, exclusive of the additional tonnage of the Standard Growers' Exchange, is estimated at a very large increase over the last season. When to this is added the large holdings which the co-operative organization will sell for the account of the Standard, it is anticipated the exchange total for next season will be imposing.

It was estimated that increased freight charges last season cost the exchange growers along some $2,400,000 above the normal transportation costs. The cost to the exchange, of fighting for reduced freight rates, together with the successful resistance it lead against the proposed diversion restructions and for retion of the bulge pack, was considerable. However, the traffic department of the exchange during the year collected in excess of $130,000 in claims against carriers. The reduction of thirty-six cents per box on grapefruit, recently secured from northwestern lines to Montana, Oregon and Washington points, it is hoped, is only the beginning of a readjustment of freights to lower levels, for which the entire exchange organization has been bending every effort.

Can Pre-cool 500,000 Boxes

Four pre-cooling plants now in operation it is estimated will next season permit the handling of a total of 500,000 boxes of precooled fruit with a saving of forty-five dollars per car in refrigeration cost, while reducing decay in transit very materially. Precooling is to be studied carefully by the exchange. Much scientific data is being accumulated, which shortly will be made available to all local associations in pamphlet form.

Exchange advertising the last year was reported as the most ambitious effort in its history, the larger volume of shipments and consequent larger funds, making it possible. The results were gratifying, and met with

(Continued on Page Two.)

BYRON P. GRAY DEAD NEWS RECEIVED HERE

A telegram received Saturday morning by Mrs. Marie Frost brought the sad news that Byron P. Gray had died the night before at his norhtern home at Wolf Lake, Ind. While it was known here that Mr. Gray had been ill recently it was not known that his condition was critical and the announcement of his death brought surprise and sorrow to his many friends here. Mr. Gray has been a winter resident of New Smyrna for many years and was one of the best known among the winter residents. He was the owner of much property in the city and last winter made some heavy investments in land in the south end of the county, having in mind improving and adding to the holdings this winter. Mr. and Mrs. Gray have not missed a winter in New Smyrna for many years and he will be sadly missed this winter.

Mr. and Mrs. Gray have been winter residents of this city for the last 15 years and Mrs. Gray and her daughter and son-in-law plan to start for New Smyrna in October to spend the winter here.

Mr. Gray was overcome by the heat early in the summer while burning some brush in an old fence row on his place. He made a trip to California and on his return was taken with the flu, took cold by exposure and continued to grow worse until his death last Friday. Because of the condition of his health this summer they had already made plans for an early start for New Smyrna. Mr. Gray was 76 years of age and was one of the early settlers at Wolf Lake, where he had been in the mercantile business fore more than 50 years. Funeral services were held last Sunday.

TO OPEN NEW PARK WITH BAND CONCERT

BANDSTAND TO BE MOVED TO CITY BLOCK AND FIRST CONCERT WILL BE GIVEN ABOUT OCTOBER 15TH.

New Smyrna's new city park in the city block will be dedicated, or opened, with an open air concert by the New Smyrna band, which will make its first public appearance at that time, about the middle of next month, according to the present plans.

The bandstand erected a couple of years ago over the canal on Canal street is to be moved to the new park and the band concert will be rendered from the bandstand in its new location.

The matter of preparing the city block as a park was discussed at the regular meeting of the city commission this week, the board of trade trade meeting being adjourned that the members of the board of trade might attend the commission meeting to discuss the proposition with the commissioners.

In the discussion of the matter it was brought out that all preliminary arrangements can be completed in two weeks. Included in these preliminary preparations will be the moving of the bandstand, which will have to be moved soon any way to premit the covering of the canal, the moving of the city pound to the present location of the old jail on Lytle avenue, the clearing away of all pipes and supplies, which will be moved to the lot on which the light plant is located, and the moving of the buildings, except the jail and the building in which the fire fighting apparatus is stored.

The ground will be thoroughly cleared and graded by the street gang and put in as good condition as possible by the time of the opening concert by the band.

Later the work of laying out the grounds for the planting of trees, plants and grass will be undertaken and a cement sidewalk will be laid by the city on all four sides of the block. The plans of the city commission contemplate that the new park shall be made a real recreation ground for home folks and winter visitors.

SPORTS SHOULD STUDY LAWS; AVOID TROUBLE

HUNTING SEASON DOES NOT OPEN UNTILL NOVEMBER 20 AND KILLING GAME NOW IS AGAINST LAW.

Sportsmen who wish to comply with the law and advoid trouble, should study the game laws and comply strictly with the provisions thereof against hunting out of season. Severe penalties may be imposed for infractions of the game laws.

The open season is still sometime away, the game laws forbidding the killing of deer and birds before November 20th, but in order that none may plead ignorance many newspapers are publishing the following synopsis of the law:

Under the law, the open season for all game commences on November 20 and extended to February 15 of the following year—making a period of eighty-eight days. Residents of Florida may procure a hunter's license, good only for the county in which they live, for $1.25; but the fee for each additional county will be $3.50. For all non-residents the cost of the license for each county in which they desire to hunt will be $25. The maximum amount of game allowed each gun per day is one deer, two turkeys, twenty quail, and twenty-five birds of other varieties. If there is a party of three or more the limit of game such party may take during the entire trip, aside from quail and other birds, is two deer and five turkeys; and no individual hunter shall kill during any one season more than two deer, five turkeys and five hundred of any and all sorts of birds. No individual hunter or party of hunters shall have any game in his or their possession longer than five days after the close of the hunting season. Fur-bearing animals are also protected by the game laws and trappers are required to pay licence and are allowed to set traps on lands other than their own only by obtaining written permission from the owners of such lands.

As wild game is protected and thus given safety and in a measure cared for by the state it is reasonable to allow residents to secure hunting licenses at a small cost, while those who merely hunt while temporarily in the state are charged a greater fee. The cost of the license is no greater than is charged practically everywhere.

CROWDED CONDITIONS FACE PUBLIC SCHOOL AT OPENING

Additionl Teachers Must be Obtained and More Room Provided if Satisfactory Work Is to Be Carried on in the New Smyrna Public Schools This Year.

With an enrolement of practically 60 more the first day than there was at the end of the first week last year, the New Smyrna public schools opened Monday morning facing the serious question of providing room in which to take care of the large number of pupils enrolled. Immediate efforts were started to obtain on additional teacher to assist with the third grade and it is probable still another teacher will be required for the grade work.

With an enrollment of 95 in the high school on the opening day, the attendance in this department is much larger than ever in its history. All indications pointed to a smaller enrollment in the high school for this year because the senior class last year was large and the eighth grade class was small. Figuring on this basis arrangements were made to carry on the work this year with one less instructor than last year. An additional instructor has been asked for and will be absolutely necessary if satisfactory work is to be done in this department this year, as all classes will be much larger when the children of the winter residents arrive. The enrollment in the high school will probably be well over 100 by the end of the first month of school and still larger by the first of the year. Because of the less number of teachers in the high school the classes all have more pupils than the regulation permits, all having more than 30 pupils.

Until the additional teacher is obtained Principal Goulding has arranged for the sections to be divided and taken on alternate days, the idea of the principal being that the pupils will gain more by taking fewer lessons in small classes, where individual attention is possible than more frequently in large classes where no individual attention is possible. This and several other temporary arrangements have been found necessary, but such changes are mearly to make satisfactory work possible, so important at the beginning, and the regular routine will be resumed when another teacher is obtained.

The fact that the enrollment in the public school has increased to such an extent that it will be necessary to seek accomodations out of the main building for the overflowing shows that the time is now ripe for increasing the size of the public school plant. This is no longer merely desirable, but it has become absolutely necessary that steps be taken at once to issue more bonds to enlarge the school plant. Since it takes over a year to get the legal process for bonding to work and building erected it is evident the time to start working for increased school facilities is right now. It can not be put off longer if we are not to face more serious conditions next year.

The large increase in the public school enrollment shows that the population of New Smyrna has grown much more than wey had realized, as the increased enrollment in the schools is concrete evidence of the increase in population. Within another year it will be impossible to accomodate the home children, to say nothing of the pupils who come to us in the winter. If the enrollment increases in the same proportion this year as it did last year the number of pupils in attendance in February will be about 515, which means we must find accomodations for almost 100 more pupils.

There are two sections of the first, second, fourth and fifth grades and another teacher for the third grade is being sought. It will be necessary to make an overflow grade between the fifth and sixth grades out of one of the fifth grade sections, and in all probability another teacher will be necessary in the seventh and eighth grades, in which departmental teaching is being done. Just where these new teachers will be housed when they are obtained and the new arrangements made, has not yet been decided, but the best possible arrangements will be made.

The enrollment in the various grades the opening day of school was as follows:

First grades	57
Second grades	47
Third grade	44
Fourth grades	44
Fifth grades	39
Sixth grades	31
Seventh grade	37
Eighth grade	29
High school	95
Total	423

Mrs. Joy Vihcent arrived yesterday morning from Cuba for a visit of several days at the home of her parents, Mr. and Mrs. H. C. Phillips.

NEW BEACH APPROACH IS NOW COMPLETED

The new cement approach to the beach is now fully completed and was thrown open for use of the public for the first time yesterday afternoon. The completion of the approach marks the finish of efforts to build a permanent approach which have been carried on for many years, and the lack of which has been a serious drawback to the beach. The old approach was inconvenient and unsafe and had been the cause of much trouble for automobiles getting onto and off from the beach. With the completion of the new, long cement approach no more trouble of this kind is anticipated.

WILL SELL PICTURES BUNGALOW BEAUTIFUL

As a plan for arousing interest in Bungalow Beautiful and at the same time raise a little money, which is badly needed at this time to carry on the plans for completing and furnishing the bungalow, the bungalow committee of the board of trade has devised a plan to sell post cards pictures of the bungalow, with each postcard sold at 50 cents, presenting the purchaser with a numbered ticket. After 200 of the pictures have been disposed of there will be a drawing and the holder of the number drawn will have his or her choice of the following: One white enamel steel Athermos refrigerator; one four burner Perfection oil stove; one four burner Puritan oil stove; one A. No 8 177 "Dandy" Crescent cook stove. These articles are on exhibition at the Hibbard hardware store and may be seen by all who are interested.

The pictures of Bungalow Beautiful are printed postcard size and style with a short description of what the bungalow contest is and may be used by the purchaser to mail to some friend or relative in the northern states. The pictures will be sold by the young ladies of the city this week and next week.

COCOA TEAM HANDS DEFEAT TO INDIANS

The New Smyrna Indians met defeat at the hands of the Cocoa baseball team at Cocoa Wednesday afternoon by the score of 6 to 4.Knowles was in the box for the Indians and pitched a game which have won for the Indians, had he been given support he deserved. Sweetland was the hurler for Cocoa and the Indians took more kindly to his curves than they did in the game he pitched here last week. Four of the Cocoa runs were made in the eighth inning, errors coming with a scratch hit and a single off Knowles in that session.

GENERAL INSTRUCTIONS ISSUED TO TEACHERS

COUNTY SUPERINTENDENT IN CIRCULAR LETTER CALLS ATTENTION TO RULES GOVERNING SCHOOLS.

In a circular letter sent to all school principals in the county to be read to the members of his faculty, County Superintendant C. R. M. Sheppard calls attention to some of the essential things to be observed in the conduct of the public schools of the county this year. Some extracts from this circular letter read as follows:

You are in possession of a list containing the names of the state adopted books to be used in the respective grades. You are cautioned not to disregard this list. It is law and an appeal to this office for permission to charge will be useless. Any teacher who violates the state uniform text book law, takes the chance of having his or her certificate revoked. Some teachers have a tendency to disregard the law and assign books at will. Such practice will not be tolerated longer.

Under the new text book law, supplementary readers may be used along with the basal readers, provided however that the basal reader shall not be discarded for the supplementary reader. We recommend the first choice supplementary reader be purchased with the basal reader, the two books to be used alternately by days. The samo recommendation applies to other subjects where a supplementary book is necessary. Principals and teachers are warned against overloading children with unnecessary books and school supplies. A majority of your patrons are folks of ordinary means, and are unable in many instances to meet the demands of principals and teachers for the purchase of books and material that are used occasionally. Please bear this in mind. Remember that a great many parents do without actual necessities at home in order to provide proper books for their children. Unnecessary demands, are under such circumstances, nothing short of a crime.

Teachers Associations

As in past, teachers will be required to meet in convention bi-

(Continued on last page.)

ALBA COURT IS SOLD T. J. TALTY OWNER

EXTENSIVE CHANGES AND IMPROVEMENTS IN POPULAR HOSTELRY PLANNED BY THE NEW OWNER.

Through a deal closed this week, T. J. Talty becomes owner of the Alba Court Inn and has already begun carrying out plans for greatly enlarging and improving the hotel with the idea of having it ready for the beginning of the winter season and then keeping it open through the year. Mr. Talty will complete what improvements and changes he can before the opening o fteh winter season and continue the plans next spring.

Mr. Talty is thoroughly experienced hotel man, having formerly conducted the Raleigh in Washington, D. C., and other first class hotels in different sections of the country. He is much impressed with New Smyrna and the future possibilities of the city and community and believes that a first class all year hotel in this city will be a paying investment.

Among the improvements planned by the new owner is the addition of a third story to the building and the addition of wings on the west, east and north sides. With the changes the capacity of the house will be greatly enlarged.

The deal for the purchase of the hotel was made through the H. A. Paxton agency.

BOARD OF TRADE WILL MEET TUESDAY NIGHT

Following out the wish of the majority, as expressed in the recent postal card ballot, the regular meetings of the board of trade will be held Tuesday nigats instead of Monday nights, beginning next week and the next meeting of that organization will be held next Tuesday night. The new officers and new board of governors will assume office at this meeting, which will be the first one in October.

EXCELLENT PROGRAM FOR CITRUS SEMINAR

ANNUAL GATHERING OF GROWERS TO BE HELD IN GAINESVILLE THE FIRST OF NEXT MONTH.

The 12th annual citrus seminar to be held at the University of Florida October 4-5 should interest every progressive grower of the state. The agricultural extension division, state plant board, college of agriculture, and U. S. department of agriculture have agreed to contribute toward making this a great success. A few topics of special interest are:

"Marketing Southern Fruits," by Chas. J. Brand, vice president and general manager of the American Fruit Growers, inc. Mr. Brand was formerly chief of the bureau of markets.

"The Pre-Cooling of Citrus Fruits," will be discussed by M. J. Daetwyler of Orlando. Mr. Daetwyler has operated a pre-cooling plant in Orange county and has some valuable ideas that growers should know about.

"The Just Valuation of Citrus Properties," will be discussed by Hon. Marion L. Dawson, state equalizer of taxes.

"The Plans for the Lake Alfred Citrus Branch Experiment Station," will be handled by Director Wilmon Newell.

"The Inspection and Transportation of Vegetables and Citrus Fruits," will be discussed by representatives of the bureau of markets, U. S. department of agriculture.

W. W. Yothers, entomologist, bureau of plant industry, will have two papers. First, "Some Fundamentals in Grove Pest Control." He will also present a paper by Dr. A. T. Speare on "The New Strains of Entomogenous Fungi." Dr. E. W. Berger of the state plant board will also have a paper on this subject and it is expected that this subject will bring up some valuable and interesting discussion.

Other papers of equal importance are: "Spraying for Thrips," by Prof. J. R. Watson, Florida experiment station; "Causes of Fluctuating Markets," by Dr. L. M. Bristol, professor of economics, University of Florida; "Quarantine Inspection Work," by J. H. Montgomery of the state plant board; and there will be a timely discussion of "Melanose and Various Causes of Fruit Dropping," by Dr. O. F. Burger of the Florida experiment station and Prof. H. E. Stevens, county agent of Lee county.

The meeting will begin promptly on the scheduled hour, 9:30 a. m. October 4. The citrus growers of the state are cordially invited to attend the seminar and to remain for the livestock roundup and beekeepers' meeting, which are to be held the two days immediately following the seminar.

Mrs. Earl Murray and children returned Sunday from North Carolina, where they have been spending several weeks. Mr. Murray will remain there for a time longer because of the condition of his health.

RECEPTION AT CHURCH IS ENJOYED BY MANY

Members of the Baptist church, congregation and Sunday school enjoyed a reception, social time and program at the church Friday evening, about 125 persons being present to participate in the social affair. M. W. Ashton, superintendent of the Sunday school, had charge of the exercises of the evening, and the following pleasing and entertaining program was rendered:

Welcome song by the Sunbeams.
Rally cry and song by the sunbeams.
Scripture reading by Riley McCullough.
Song by the congregation.
Prayer by N. S. Colee.
Song by "Becky" Ashton.
"The church and the Board of Trade," by M. W. Ashton.
"Our church and the Community," by J. T. Brooke.
"Our church and World Evangelization," by Rev. A. B. Cannady.
Song by the congregation.
Alphabet recition by the Sunbeams.
Reading by Miss Bessie Fletcher.
Recitation by two members of the Junior B. Y. P. U.
Song by the congregation.
Refreshments.

LARGE MAIL ORDER HOUSE READS ALL COUNTRY PAPERS

We have a bureau whose duty it is to read each week the country newspapers from all over the country There is not a paper of any consequence in our trade territory that our bureau does not get This bureau looks over these papers and when we find a town where the merchants are not advertising in the local paper we immediately flood that territory with our literature It always brings results far in excess of the same efforts put forth in territory where the local merchants use their local papers said Herman Rosefeld advertising manager for Sears Roebuck & Co

NEWS LANDS BIG JOB

The contract for printing the new code of the city of New Smyrna was awarded to the New Smyrna News by the city commissioners after opening and considering the competitive bids submitted at the meeting of the commission held this week This is the biggest job of printing ever undertaken by any print shop in New Smyrna and that the News plant is well equipped to handle the printing and binding of this book shows conclusively that the plant is equipped to handle anything in the line of printing It is a significant fact that there are only two printing establishments in Volusia county equipped to handle as large a job of printing as this contract calls for and that the Painter Printing company of DeLand which is considered one of the largest printing establishments in the state and the News were the only two Volusia county bidders for the contract It is also a significant fact that the equipment and printing knowledge of the News plant permits it to successfully bid for work against the state's largest plants Since the News was established in New Smyrna eight years ago the constant endeavor of the proprietors has been to build up a printing plant second to none and that we have succeeded is proven by the fact that the plant is constantly turning out a class of work that can be handled by other printing plants in this section of the state, the News is constantly doing work for other print shops along the East Coast from Hastings to West Palm Beach a class of printing which these shops have not the equipment and knowledge to handle We are proud of the fact that the News has the best equipped printing establishment on the East Coast between St Augustine and Miami and we are proud of the advertising which comes to New Smyrna by reason of this city being the home of such a plant

HIS TROUBLES VERY REAL

Nervous Man May Rise to the Occasion at Times, but He Suffers, Nevertheless.

How often have you been surprised by the person who is always worrying! How astonished you were when this person who spends all his days in almost morbid fear of "what may happen" suddenly rallies to the crisis and shames the aforetime scoffers! You then experience a burst of admiration for the nervous one you say that he merely appeared to be *unhealthily* apprehensive and cowardly but that the defect was superficial and that deep down is his real self and very stout stuff Do you think so? asks the Villager How you are fooled! It is true that many of those who build innumerable troubles from a material which unlike oil shows no signs of giving out afford excellent accounts of themselves when there is genuine cause for genuine fears But it is not that these people are always made of enduring stuff beneath the veneer of timidity rather it is the contrary They have come through such agonies in imagination that the actual experience proves infinitely easier to bear than were the dreams of it the power of suffering is worn thin and the fact seem less than the figment No loss of fortune, for example can bring in its train so much misery and melodrama such experience of starvation and social degradation as the investor of a "reconstruction period" lives through in contemplating the bankruptcy of those companies in which he holds stock No illness when it comes can be so painful as that which the neurasthenic has suffered in his craven fancies; he thinks each week he is about to have appendicitis, he does not have appendicitis, he has a few feet of his colon removed and it seems a small matter The hint of smoke torments poor sick souls a *thousandfold more than ever* can the actual tongue of flame—no not only do the fearful die many deaths before their end but they die many deaths more dreadful than the *real one Would the sophist justify* daily fear by saying it makes you capable of meeting the great emergencies? A fine thing replies the stoic if having used up all that energy fearing in order to be brave, the emergency never came! But the sophist replies in every man's life there is always the final emergency A fine thing, repeats the stoic, to order your whole life for a good deathbed!

To Clean Oil Paintings.

A simple way to clean oil paintings, and one that will not injure the colors beneath the dirt, is to cut a raw potato in half and rub it quickly over the painted surface Then polish with a silk handkerchief to remove dust or dirt

EXCHANGE HANDLED THIRD CITRUS CROP

(Continued from Page One)

the hearty approval of northern sales representative As previously the bulk of the money was spent in northern newspapers some magazine space and color pages being used

The exchange has accumulated much data on the subject of possible business of fruit by water and conference have been held in New York and Baltimore with the managements of the leading steamship lines and owners of refrigerated ships The report expressed the opinion there would be small difficulty in obtaining boats or proper wharfage facilities at northern terminals but Mr Stewart said that as yet he and Traffic Manager E D Dow had no recommendations to lay before the board as no one definite and feasible plan yet had been worked out the big difficulty being obtaining guaranteed cargo from Florida ports Such guarantees in his opinion must be forthcoming to make any such project a success as the cost of demurrage upon a boat waiting for cargo whether chartered or owned by the growers would offset all the advantages it might otherwise be hoped to gain through the use of ships

Delighted With Report

A noteworthy feature of the business manager's recommendations was one to the effect that the greater volume of fruit now being handled and certain economies to be effected would in spite of present high costs permit a decrease in the exchange selling charges for next season

A resolution was directed to the secretary of agriculture and the federal horticultural board asking for protection against the possible introduction again of citrus canker through shipments of citrus fruits now arriving from Australia and New Zealand where canker is said to exist now

The board voted a standing reward of $100 for information leading to the arrest and conviction of any person trespassing upon or pilfering from the property of any member of any local association It was felt that such an offer and the prosecution of offenders by the Florida Citrus Exchange would be greater deterrent against marauders than would action by any local community

Artistic Scottish Coins

The "Bonnet Piece" was the name given to a beautiful coin of pure gold issued under the reign of James V of Scotland the name being given because the head of the king on the coin was covered with a Scotch bonnet in place of the proverbial crown. James was the first sovereign to place dates on coins issued and coins he approved were exquisitely designed.

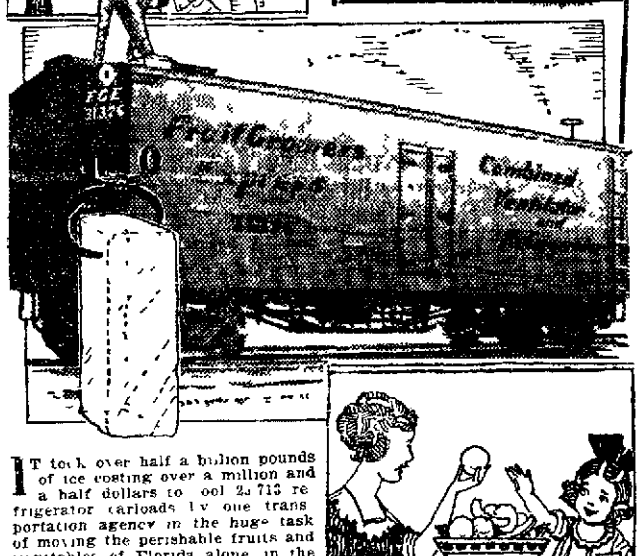
Getting Your Fruit To Market

TO MOVE FLORIDA'S 1920-21 CROP ALONE REQUIRED-
600 Million Pounds of Ice.
Costing $1,700,000
in 25,713 Refrigerator Carloads



It took over half a billion pounds of ice costing over a million and a half dollars to cool 25,713 refrigerator carloads by one transportation agency in the huge task of moving the perishable fruits and vegetables of Florida alone in the 1920-21 season to the consuming markets of the North and East Huge new ice manufacturing plants have recently been built at Jacksonville Miami Haines City and Lakeland Florida in order to insure a sufficient and regular supply of ice for the cars

This is in addition to the movement of 10,000 cars of Georgia peaches and other thousands of cars of small fruits and vegetables in iced cars from the Carolinas and Virginia where large modern icing plants have been constructed

These figures will be startling to the thousands of fruit and vegetable growers of the South who have not been informed as to the actual workings of the great new adjunct to the transportation industry that is fast increasing the wealth of the Southern States

A mass of conflicting information and fragmentary figures was recently submitted to the Interstate Commerce Commission in Washington in connection with the application of the Florida Railroad Commissioners for a reduction in refrigeration charges and in the near future the effort will be made by the transportation companies to throw the spot light on the actual operations and all the costs involved in protecting the products of Southern fruit and vegetable growers from their farms and plantations to the tables of consumers in New York Chicago and other great and distant markets

Certain of their officials state that the public lacks reliable information of what it actually means to take an orange a head of cabbage or lettuce a bunch of celery a grape fruit or a box of strawberries from the warm Southern climate to the table of the Northern consumer in as fresh and edible condition as though grown on his own back yard They want that information to be gathered by an official body so that the farmer who raises and ships his crop and the man in New York who buys the fruits and out of season vegetables once looked upon as luxuries may know whether they are paying fair charges for refrigeration enroute to market and whether the transportation companies can give proper service on the charges allowed by the Federal Commission

The volume of shipments under refrigeration out of Florida alone last year was twice that of two years ago and six times that of nine years ago indicating the importance of the question for the future both to producers and consumers

PLANS FOR HYGENIC CLINICS FOR CHILDREN

Plans for the child hygiene survey of the state have been completed and the work will start October 1st. Three units will be sent from the United Statse public health service to assist the state board of health in this work.

The program is an ambitious one and aims to establish a child welfare organization throughout the state that will include in its activities all phases of child life.

The first unit to arrive will be a dental unit. The work of this unit will consist of lectures and demonstrations in dental hygiene. The importance of caring for the teeth will be stressed, as will the relation of decayed teeth to disease.

Moving pictures will be shown and a playlet given by those making up the unit. The importance of the work of this unit will be realized when we consider that the examination of the school children in several counties last year revealed the fact that defective teeth was first on the list of defects found. About 80 per cent of all children examined were found to have defective teeth.

The other units, consisting of a doctor, a nurse and a microscopist, will start in different paris of the state. They will begin by the examination of the school children and will inaugurate a follow-up system to see that the defects revealed by the examination are corrected whenever possible.

Clinics will be established for the instruction of mothers in the proper care and feeding of infants.

Lectures will be held for midwives, and instruction given in the proper managment of child birth and the importance of birth regulation.

The Florida Federation of Women's Clubs is actively assisting in the preparation for the survey and under the direction of Mrs. J. W. McCollum, president. and Miss Elizabeth Skinner, chairman ofpublic health committees, local commitees have been formed in nearly every community to help make this work permanent.

A London Statue.

The Achilles statue in Hyde park, London, was cast from a cannon captured during the Duke of Wellington's victories. and is dedicated to him and his troops.

OAK HILL NOTES

Mr. and Mrs. J. N. Mosby of Titusville were visitors here Sunday.

George Bennett spent a few days early in the week at the home of his son, Horace Bennett.

G. G. Harman and Loren Harman returned to their home Wednesday after visiting Roy Harman and family.

Mrs. Coleman Williams and son spent last week end in Daytona, going up to meet her mother on arrival from the north.

Mrs. Horace Bennett and children returned from Titusville Sunday after a pleasant visit at the home of her mother and father.

School opened Monday with about 60 pupils enrolled and the following teachers in charge: Mr. Williams, Mrs. Fogle and Miss Odom.

Mrs. Oliver Arnold and son of Inverness have been visiting at the home of Mrs. Harry Sargent this week. Mrs. Arnold will be remembered as Miss Theida Mendell.

Mrs. F. M. Stanley made such a creditable showing at Ariel last year that she has again been assigned as teacher there for this year. Mrs. Stanley has made many friends since coming here early in July.

Honoring Mrs. W. H. Snyder, who has just returned from Beaver, Pa., several of her friends entertained at a beach party Sunday afternoon. After enjoying the delights of the ocean a delicious supper was served at the pavilion. Those included in this party were Mr and Mrs. J. K. Rowley, Mrs. W. H. Snyder, Mr. and Mrs. G. L. Comer, Jr., Mr and Mrs. Hubert Megruder, Miss Kuebler and L. L. Mosby.

Mr. and Mrs Harry Simmons and Mrs. F. M. Stanley entertained jointly the sewing club last Wednesday afternoon at the home of Mrs. Simmons. The house was beautifully decorated with potted plants and vases of cut flowers. A very pleasant musical program was rendered throughout the afternoon by Mesdames Patillo, Deal, Simmons and Miss Keyser. Later punch and cake were served.

In Circuit Court. Seventh Judicial Circuit, in and for Volusia County, Florida.

In Chancery

NOTICE

BESSIE L. TAFFE,
Complainant,
vs.
JOHN H. TAFFE,
Defendant.

TO: John H. Taffe, 401 West 47th St., New York City, N. Y.

You are hereby required to appear to the Bill of Complaint filed herein against you in the above entitled cause on or before the 3rd day of October, A. D. 1921.

"New Smyrna News" is hereby designated as the newspaper in which this order shall be published once each week for four consecutive weeks.

WITNESS My hand and seal of office at DeLand, Volusia County, Florida, this 29th day of August, A. D. 1921.

SAM'L D. JORDAN, Clerk.
By CLIFFORD BOTTS, D. C.
(SEAL)

F. W. POPE,
Solicitor for Complainant.
(sep2-30)

Too Many Before Him.

Edward, returning empty handed from the post office, said: "You will have to send me earlier next time, mamma, because when I got there the letters were all gone."

You've Struck it Right when you Light a CAMEL

Your taste will tell you that! For Camels have the flavor and fragrance of choicest tobaccos, perfectly blended. They're smooth and mellow-mild.

And there's NO CIGARETTY AFTER-TASTE.

We put the utmost quality into this one brand. Camels are as good as it's possible for skill, money and lifelong knowledge of fine tobaccos to make a cigarette.

That's why Camels are THE QUALITY CIGARETTE.

R. J. REYNOLDS Tobacco Co. Winston-Salem, N. C.
